### INDEX NIFTY OUTLOOK:

S&P CNX Nifty future closed **down 74.15** points at **10044.14**. Indian Stock Market would open negative for the day. Indian Stock Market is still in negative zone. Nifty has formed DOJI candlestick pattern that suggest indecisiveness. So, this means that if Nifty doesn't breach **10065** spot levels in upcoming sessions then we would see reversal from here. Closing above **10150** would suggest that market would again see recovery from here. But Market would see reversal only if it closes above **10194** for Nifty.
