INDEX NIFTY OUTLOOK:

S&P CNX Nifty future closed **down 12.85** points at **10477.90**. Indian Stock Market would open positive. Technically, Indian Stock Market is still in positive zone. Today, we are headed towards F&O Expiry and huge volatility would be seen in the market. Traders can continue to hold long positions until Nifty holds above **10397** for Nifty. Yesterday's movement has shown some bearish signal. Trading below **10470** can induce some further profit booking and traders can book partial profits in that case but short positions should not be initiated until Nifty closes below **10397** levels.
