### INDEX NIFTY OUTLOOK:

S&P CNX Nifty future closed **UP 52.80** points at **10530.70**. Indian Stock Market would open flat. Technically, Indian Stock Market is still in positive zone. Markets have been consolidated for last couple of days and we may soon see a breakout from the range. Trading below **10460** for Nifty would induce risk of selloff whereas breaching levels of **10550** for Nifty would force market to see a sharp breakout. Traders should hold maximum cash in hand until the clear trend emerges. For now, traders should wait and watch. Market would see reversal and would enter into negative trend only if it closes below **10397** for Nifty.
