**INDEX NIETV OUTLOOK:**

S&P CNX Nifty future closed UP **194.55** points at **10421.40**. Indian Stock Market would open gap positive. But Indian Stock Market would open gap positive backed by positive US Job reports. Market would see sharp recovery but now we need to check whether market manages to close above 10350 from market has taken breakdown. Though Market would see reversal once it closes above **10305** but closing above **10350** would confirm that the bottom has been seen for the short term and market would see sharp recovery. Overall, traders can close all short positions and initiate fresh long positions once Nifty manages to close above **10305** levels.
