

Techno Tomorrow

Date: 11/01/2019

It's a negative end on the market on Thursday, with the Nifty holding on to 10,800-mark.. At the close of market hours, the Nifty down 33.55 points or 0.31% at 10821.60. The price action formed a inside candle and took support near 200Day SMA which was placed at 10800. The index is likely to extend consolidation in the broader range of 10500-11000 in coming weeks and form another sequential higher base. In coming session, index is likely to trade above 200 Days SMA. Thus, intraday throwback towards 10800 – 10780 should be used as incremental buying opportunity that would pave the way towards 10900. Failure to do so, continuance of stock specific action.
